

MARINE POLLUTION SURVEILLANCE REPORT

Analysis Provided by: The National Oceanic and
Atmospheric Administration/National Environmental
Satellite, Data and Information Service (NOAA/NESDIS)

REPORT DATE: April 12, 2012

REPORT TIME: 1500Z (1000 CDT)

ANALYST: WARREN

DATA SOURCE: NASA TERRA

MODE: Multispectral

RESOLUTION: 250 meter

IMAGE DATE/TIME: 4/11/12 1645Z (4/11/12 1145 CDT)

Legend

-  Possible Oil
-  False-Positives (not oil)
-  Suspected Point Source:
[28°12'8" N / 89°17'8" W]

REMARKS:

An elongated 15 mile long suspected oil sheen has been identified in this satellite imagery approximately 130 miles south-southeast of New Orleans, LA. The sheen is in a area of several known natural seep sites, however based on location and orientation this sheen does not appear to be associated with any natural seeps as surface winds were from the north and ocean surface currents were from east to west.
