Legend

-  Possible Oil
-  Center Point of Oil Slick:
[28°52'46" N / 88°49'20" W]
-  Destroyed Taylor Platform :
[28°56'9" N / 88°58'12" W]

REMARKS:

An area of possible oil is seen about 12 miles southeast of the Bird's Foot Delta region of southeast Louisiana and approximately 6.7 miles east-southeast of the destroyed Taylor platform. The suspect oil is 9 miles in length extending from northwest to southeast. While not connected to the Taylor platform it is in an area of sun glint with no obscuring clouds. Ocean currents are from west to east and there was a suspected oil slick detected yesterday that was attached to the Taylor site.
