

# MARINE POLLUTION SURVEILLANCE REPORT

Analysis Provided by: The National Oceanic and  
Atmospheric Administration/National Environmental  
Satellite, Data and Information Service (NOAA/NESDIS)

REPORT DATE: AUGUST 04, 2013  
REPORT TIME: 1904Z (1404 CDT)  
ANALYST: JANKOT

DATA SOURCE: TERRA MODIS  
MODE: Multispectral  
RESOLUTION: 250 meter  
IMAGE DATE/TIME: 8/4/2013 1650Z (1150 CDT)

## Legend

-  Possible Oil
-  False-Positives (not oil)
-  Destroyed Taylor Platform :  
[ 28°56'9" N / 88°58'12" W ]

1.95km<sup>2</sup> Area of Possible Oil

## REMARKS:

A narrow slick was seen extending east from the destroyed Taylor Platform for approximately 2 miles. Cloud cover prohibited detection on the east side portion of the anomaly suggesting the slick could extend beyond 2 miles. Ocean currents suggested a west to east flow, following pattern seen in the image. Surface winds were also weak from the northwest at 5-10 knots.
