

MARINE POLLUTION SURVEILLANCE REPORT

Analysis Provided by: The National Oceanic and
Atmospheric Administration/National Environmental
Satellite, Data and Information Service (NOAA/NESDIS)

REPORT DATE: DECEMBER 12, 2013
REPORT TIME: 0303Z (12/11/2013 2103 CST)
ANALYST: WARREN

DATA SOURCE: LANDSAT-8 OLI
MODE: Multispectral
RESOLUTION: 30 meter
IMAGE DATE/TIME: 12/11/2013 1627Z (1027 CST)

Legend

-  Possible Oil
-  False-Positives (not oil)
-  Destroyed Taylor Platform :
[28°56'9" N / 88°58'12" W]

1.35 km² Area of Possible Oil

REMARKS:

A small, narrow sheen could be seen in satellite imagery taken earlier this morning extending west-southwest from the destroyed Taylor site. Sheen was estimated from satellite to be 4.7 miles long and 0.26 miles at it's widest. Orientation of sheen matches well with 10-15 kt east-northeasterly surface winds and southwest flowing ocean currents.
