False-Positives (not oil)

Destroyed Taylor Platform :
[28°56'9" N / 88°58'12" W]

64.8 km²

Area of Possible Oil

REMARKS:

A slick could be seen in this MODIS image extending approximately 40 km northeastward from the destroyed Taylor platform. This slick was about 2.5 km wide at the widest point. Sky conditions were partly cloudy over the site though few clouds were actually obscuring the slick. Winds were generally weak/variable at the time of the image with ocean currents from the southeast.
