## Legend

-  Possible Oil
-  False-Positives (not oil)
-  Destroyed Taylor Platform :  
[ 28°56'9" N / 88°58'12" W ]

2.46 km<sup>2</sup> Area of Possible Oil

REMARKS: Suspected oil slick is seen extending southwest of the destroyed Taylor Platform for approximately 3.5 miles. Ocean currents are northeast to southwest following the orientation of the suspected slick with surface winds out of the north to north-northeast at 10-15 knots. The slick may extend further to the southwest but lack of sunglint and scattered clouds obscured the view beyond what was outlined.
