

# MARINE POLLUTION SURVEILLANCE REPORT

Analysis Provided by: The National Oceanic and  
Atmospheric Administration/National Environmental  
Satellite, Data and Information Service (NOAA/NESDIS)

REPORT DATE: APRIL 20, 2014

REPORT TIME: 0057Z (4/19/2014 1957 CDT)

ANALYST: JANKOT

DATA SOURCE: AQUA MODIS

MODE: Multispectral

RESOLUTION: 250 meter

IMAGE DATE/TIME: 4/19/2014 1950Z (1450 CDT)

## Legend

-  Possible Oil
-  False-Positives (not oil)
-  Destroyed Taylor Platform :  
[ 28°56'9" N / 88°58'12" W ]

## REMARKS:

Possible oil extends for approximately 3 miles along a east to west axis and suspected point source is the Destroyed Taylor Platform, a repeat leak source. The anomaly has a bright colorization appearance to it. Ocean currents are out of the east supporting the general orientation of the suspected anomaly. However surface winds are out the north at 5-10 knots increasing uncertainty. Moving sediment is also in the vicinity of the anomaly, also providing some uncertainty.
