REMARKS:

Please note this image was from yesterday December 14 at 1626Z. Anomaly extends for approximately 12.8 miles to the southwest of the Destroyed Taylor Platform, a repeat leak source. Anomaly appears as a lighter color to its surroundings and sky conditions were partly cloudy at time of the image, not obscuring the view of the anomaly. Surface winds were around 5 knots out of the northeast at time of the image and agree with the orientation of the slick.
