Legend

-  Possible Oil
-  False-Positives (not oil)
-  Destroyed Taylor Platform :
[28°56'9" N / 88°58'12" W]

12.5 km² Area of Possible Oil

REMARKS:

A narrow and elongated, silvery-colored anomaly believed to be oil sheen extending southeast from the destroyed Taylor site. The sheen's size is estimated to be 9.7 miles long by 0.5 miles wide. Due to scattered cloud cover across the area, the full extent of the sheen may not be captured in satellite imagery. This agrees very well with earlier NRC report (#1089004), 4 hours prior to satellite pass.
