33.7km<sup>2</sup> Area of Possible Oil

Possible oil is connected to the Destroyed Taylor Platform, a repeat leak source. The anomaly extends for approximately 16 miles along a west to east axis and as wide as 1.5 miles along a north to south axis. The anomaly appears dark and in clear contrast to its surroundings. Winds were out of the northeast at 5-10 knots and modeled ocean currents were also out of the northeast at the time of the image.
