[28°56'9" N / 88°58'12" W]
-  12.2 km² Area of Possible Oil

Confidence: High

Possible oil slick located approximately 13 miles southeast of the Bird's Foot Delta and suspected to be originating from the destroyed Taylor platform. The slick is 4.7 miles long and 2.9 miles wide, and its orientation is supported by the direction of the currents and winds in the area. The full extent of the slick is unknown due to the presence of clouds. The slick tested negative for vegetation.
