CONFIDENCE: Medium

REMARKS:

An oil slick was observed extending 2.4 miles from northwest to southeast. The slick was up to 0.7 miles wide. Winds were from the southeast at 5 knots at the time of the image.

The anomaly appears silvery in sunglint conditions, but clouds to the southeast obscure a portion of it. The anomaly is consistent with sheens described in NRC Incident Reports 1122183 and 1122220.
