

MARINE POLLUTION SURVEILLANCE REPORT

Analysis Provided by: The National Oceanic and
Atmospheric Administration/National Environmental
Satellite, Data and Information Service (NOAA/NESDIS)

REPORT DATE: JULY 19, 2015
REPORT TIME: 2249Z (1749 CDT)
ANALYST: JANKOT

DATA SOURCE: AQUA MODIS
MODE: Multispectral
RESOLUTION: 250 meter
IMAGE DATE/TIME: 7/19/2015 1900Z (1400 CDT)

Legend

-  Possible Oil
-  False-Positive (not oil)
-  Destroyed Taylor Platform :
[28°56'9" N / 88°58'12" W]
-  14.9 km² Area of Possible Oil

CONFIDENCE: Medium

REMARKS:

Possible oil is connected to the Destroyed Taylor Platform, a repeat leak source. Anomaly is outside of sunglint region in this image, lowering confidence. Anomaly is lighter than its surrounding and extends for approximately 10 miles to the northeast of the suspected point source. Surface winds were weak at the time of the image and modeled ocean currents were also weak. Confidence is slightly higher given that NRC report # 1123215 also reported oil seen connected to the Destroyed Taylor Platform but did not confirm orientation of the slick.
