

# MARINE POLLUTION SURVEILLANCE REPORT

Analysis Provided by: The National Oceanic and  
Atmospheric Administration/National Environmental  
Satellite, Data and Information Service (NOAA/NESDIS)

REPORT DATE: JUNE 05, 2015  
REPORT TIME: 2040Z (1540 CDT)  
ANALYST: JANKOT

DATA SOURCE: TERRA MODIS  
MODE: Multispectral  
RESOLUTION: 250 meter  
IMAGE DATE/TIME: 6/5/2015 1700Z (1200 CDT)

## Legend

-  Possible Oil
-  False-Positive (not oil)
-  Destroyed Taylor Platform :  
[ 28°56'9" N / 88°58'12" W ]
-  31.3 km<sup>2</sup> Area of Possible Oil

**CONFIDENCE: High**

## REMARKS:

The possible oil appears to be attached to the Destroyed Taylor Platform, a repeat leak source. The anomaly appears darker than its surroundings, a common oil signature seen outside of sunglint conditions. The anomaly extended for upwards of 17 miles to the southwest and surface winds were generally light at the time of the image. ASCAT winds taken earlier suggested a northeast wind at 5 knots, generally agreeing with the orientation of the slick.
