## REMARKS:

The anomaly corresponds to a hotline that was opened for "Breton Sound 21 Well, Breton Sound, LA." The initial sheen on June 6, 2015 was estimated to be 37 gallons based on overflight sheen calculation. The anomaly seen in the image matches with the coordinates that were given in the hotline. It extends for approximately 16.8 miles with a maximum width of 1.3 miles. The sheen is consistent with wind speed and direction. The cause of the sheen is said to be a leaking well casing according to the hotline.
