

MARINE POLLUTION SURVEILLANCE REPORT

Analysis Provided by: The National Oceanic and
Atmospheric Administration/National Environmental
Satellite, Data and Information Service (NOAA/NESDIS)

REPORT DATE: OCTOBER 15, 2015

REPORT TIME: 0150Z (10/14/2015 2050 CDT)

ANALYST: TURK

DATA SOURCE: LANDSAT-8 OLI

MODE: Multispectral

RESOLUTION: 30 meter

IMAGE DATE/TIME: 10/14/2015 1626Z (1126 CDT)

Legend

-  Possible Oil
-  False-Positive (not oil)
-  Suspected Point Source:
[29°25'47" N / 89°09'48" W]
-  .6 km² Area of Possible Oil

CONFIDENCE: Low

REMARKS:

A 2.3 mile long anomaly that was up to 0.1 mile long extended to the southwest of a point source that could not be positively identified as an oil production facility, but a pipeline emanates from this location. Confidence is low because the nature of the point source is ambiguous.

Skies were clear and winds were from the north at 10-15 knots at the time of the image.
